

# Alan Turing

Mathematician Alan Turing (1912-54) was among the many brilliant people working for British Intelligence during WWII. He played a key role in deciphering...

## ...the ENIGMA CODE!!

...and his work on computer theory and artificial intelligence led to the development of modern computers

### EARLY COMPUTERS

Turing's team of Cryptographers at the British code-breaking centre at Bletchley Park, developed the "BOMBE" to decipher the first German Enigma messages.

It is said his team...

The "Bombe" could test every possible combination of rotor positions used by Enigma. A Enigma grew more complex, Britain built Colossus, a forerunner of modern electronic computers.
